SUPERPREMIUM DOG FOOD

# CARNI LOVE

JUST LIKE WOLVES, DOGS ARE NATURAL **CARNIVORES**. THEIR DIGESTIVE SYSTEM AND DENTAL ANATOMY ARE ADAPTED TO THEIR **NATURAL FOOD SOURCE**, I.E., MEAT AND BONES. THE RELATIVELY AGGRESSIVE PH OF THEIR STOMACH AND SHORT SMALL INTESTINE ARE IDEAL FOR DIGESTING FOOD OF **ANIMAL** ORIGIN. IN ADDITION, MEAT IS A SOURCE OF A RANGE OF B VITAMINS AND **ESSENTIAL AMINO ACIDS**. CARNILOVE IS DESIGNED TO MEET THE **NATURAL NUTRITIONAL REQUIREMENTS OF DOGS** WITH A VIEW TO THEIR **BIOLOGICAL ORIGIN** AND **ANATOMICAL DISPOSITION**. GIVE YOUR DOG A SENSE OF **HARMONY WITH NATURE**.

**70%**   
**CHICKEN**  
**65%**   
**SALMON & WHITE FISH**  
**SUPERPREMIUM  
DOG FOOD**  
**- GRAIN-FREE -**

## UNIQUE COMPOSITION:

**70% CHICKEN  
65% SALMON  
& WHITE FISH**

Meat contains **essential amino acids** for muscle nutrition. The higher protein content supports the body with the **increased production of antibodies**.

**GRAIN-FREE**

Cereals are not a natural source of energy for dogs but a source of empty calories.

**GRAPES,  
CRANBERRIES,  
POMEGRANATE**

The unique combination of fruit extracts gives the body vital **natural antioxidants** and strengthens the immune system.

A dog is sitting on a mossy log in a forest. The background is filled with green trees and foliage. The text 'WHICH DOGS SHOULD EAT CARNILOVE?' is written in large, white, bold, sans-serif capital letters. A dotted line is positioned below the text.

## WHICH DOGS SHOULD EAT CARNILOVE?

CARNILOVE IS A SUPER PREMIUM PET FOOD SUITABLE FOR ALL ADULT DOGS, FORMULATED ACCORDING TO THEIR NATURAL NUTRITIONAL REQUIREMENTS. IT'S IDEAL FOR ACTIVE BREEDS AND DOGS THAT CAN BETTER DIGEST AND UTILISE ENERGY FROM ANIMAL SOURCES. THE HIGH MEAT CONTENT HELPS MAINTAIN YOUR DOG'S GREAT CONDITION LONG-TERM.

A dog is looking out from a hole in a log. The dog's head and front paws are visible, and its tongue is hanging out. The background is dark, and the hole in the log is illuminated from within, creating a warm, orange glow.

CARNILOVE IS ESPECIALLY SUITABLE FOR FOLLOWING TYPES OF DOGS:

## SPORTING DOGS

### TYPICAL BREEDS:

*Alaskan Malamute, Australian Shepherd, Border Collie, Jack Russell Terrier, Yorkshire Terrier, Cavalier King Charles Spaniel, Collie, German Spitz, Parson Russell Terrier, Poodle, Rhodesian Ridgeback, Samoyed, Scottish Terrier, Siberian Husky, Shetland Sheepdog.*

This category includes a wide range of breeds and typical sporting dogs, whether amateur or professional. Mushing, agility, flyball, coursing, etc. are modern disciplines which provide a great deal of fun and **strengthen the relationship between a dog and its master**. Typical sports breeds are energetic, with a tendency towards speed, endurance and a willingness to cooperate. We recommend food with a high level of nutrients and energy for sporting dogs.

## MOLOSSERS AND BULLDOGS

### TYPICAL BREEDS:

*American Staffordshire Terrier, Argentine Mastiff, Bernese Mountain Dog, St. Bernard, Bordeaux Mastiff, Fila Brasileiro, Bull Terrier, Bullmastiff, Cane Corso, South Russian Sheepdog, Leonberger, Mastiff, Newfoundland, Great Dane, Spanish Mastiff, Staffordshire Bull Terrier, Tibetan Mastiff, Tosa.*

Molossers and bull terriers are known for their sturdy frame and body structure and powerful muscles – their imposing appearance is desired. This type of dog is at danger of obesity and the associated heart and circulatory diseases. Giving them food primarily derived from animal sources does not put pressure on the body with empty calories and, with sufficient movement, helps them to maintain optimum health. The chondroprotective agent content is also a necessity in their food to support healthy joints and cartilage.

## HUNTING DOGS

### TYPICAL BREEDS:

*English Setter, Basset, Beagle, Border Terrier, Dalmatian, Finnish Spitz, Fox Terrier, Irish Setter, Dachshund, Labrador, Norwegian Lundehund, Munsterlander, Pointer, Retriever, Saluki, West Highland White Terrier, Whippet, Vizsla, Weimaraner.*

The main attributes of hunting dogs are their **great sense of smell, endurance and willingness to work** with their master. In terms of nutrition, it is necessary to offer the dog the most natural way to feed, so as to preserve its natural hunting instincts. Energy obtained from animal sources supports thermoregulation and provides this dog group with a great way of replenishing calories after a day of activity.

# WORKING AND RESCUE DOGS

# SUITABLE SUPPORT FOR THE BARF DIET

## TYPICAL BREEDS:

*Akita Inu, Beauceron,  
Belgian Shepherd, Boxer,  
Czechoslovakian Wolfdog,  
Doberman, Hovawart, Bohemian  
Shepherd, Schnauzer, Landseer,  
German Shepherd, Pyrenean  
Mastiff, Rottweiler, Shar Pei.*

Working dogs often work in extremely difficult conditions. They must be able to withstand stress and rapid changes in conditions. A high-protein food ensures sufficient protein for muscle development and maintenance, improved durability and muscle protection (strength and flexibility) on exertion. The antioxidant content from natural sources supports immunity for the body through the increased production of antibodies.

Carnilove represents a natural way to feed, just like the BARF method: the balance of animal ingredients, fruit and vegetables is at approximately the desired ratio of 70:30. The advantage over the classic BARF method is the steady flow of nutrients – especially for the less experienced or the busy breeder. Due to the varied products, Carnilove offers variety both in terms of taste and essential amino acids. Carnilove is made with no cereals whatsoever – suiting the natural nutritional requirements for dogs.

# High in Chicken

**70%** CHICKEN-BASED  
INGREDIENTS

COMBINATION OF HIGHLY DIGESTIBLE PROTEINS  
AND LIFE-BENEFICIAL NUTRIENTS CONTRIBUTES TO ACTIVE  
AND VITAL CONDITION

**SUPERPREMIUM FOOD FOR ADULT DOGS**

**COMPOSITION:** dehydrated chicken 32%, chicken meal 30%, potatoes, potato protein, chicken fat (naturally preserved with tocopherols) 5%, dried apples (a source of fructo-oligosaccharides), hydrolyzed chicken liver 3%, salmon oil, brewer's yeast, fruit & herbal extract 300 mg/kg (grapes, rosemary, turmeric, citrus fruit, and cloves), hydrolyzed crustacean shells (a source of glucosamine), chondroitin sulphate, hydrolyzed yeasts (a source of mannan-oligosaccharides), Yucca schidigera extract, dried cranberries extract 50 mg/kg, pomegranate extract 50 mg/kg.
